20           JOE KENNEDY: My name is Joe Kennedy. I  
21 think our concern is what you said right there. With  
22 transportation that's a major concern for us where they  
23 are going through our tribal lands up near Scottish  
24 Junction. I think nuclear waste is a big problem. You  
25 guys, I mean they are making more and more and it's

0011

1 becoming a problem. They are going to get so much.  
2 Where are you going to store it later on? I mean it's  
3 going to be a big issue pretty soon. Whose backyard  
4 next? Is what I'm asking the question.

5           And I think you need to come forward to the  
6 tribes and connect with them like we talked about the  
7 puzzle, we need to put all these together and, you know,  
8 where we can get the answers and tribes are looking for  
9 answers and they want answers.

3           JOE KENNEDY: I have one comment. My

4   children don't want this. Do yours?
